Estimate the crop yield using data analytics:

Crop production in India is one of the most important sources of income and India is one of the top countries to produce crops. As per this project we will be analyzing some important visualization, creating a dashboard and by going through these we will get most of the insights of Crop production in India. Our project predicts the crop yield according to the climatic conditions and area of different states in india.It helps the farmers to yield maximum by cultivating right crop at right time
